

Mocha was the unfortunate victim of our very first episode of Puppy Mange We are happy to announce that all pups have made a complete recovery. We were more than happy to pay for medication to see the true beauty these pups turned into!Nugget faired very well and is once again enjoying her youth as a spoiled house dog and will not be bred again untill 2009 Spring.

Hi Mark and Deb,

Here are some photos of the wonder Buggs They are doing great. Moka has a full head of fur. They are both 9 lbs and full of energy...lots of energy. We are so glad to have them both. One day we will have to bring them out for a visit.

Have a great day.
