

Hi my name is Larry

On January 18,2007 we got a new member of our family, her name is Molly. Molly was born in December 2006.When Mark and Deb released Molly to us we could tell that Molly was in good hands for the first few months of her life. Mark and Deb are very caring of there animals which they consider a part of there family.I still keep in contact with Mark and Deb whenever i need tips on raising a bugg properly, they also call us to check on Molly and to see that everything is going good. This shows how much they care about their buggs and their bugg off spring.I am very happy to have Molly and very happy that Molly came from such a caring home.
